

What Customers Say About Spray Nine

"I just wanted to say that (Spray Nine) is the best product I have ever used. I purchased my first bottle at a swimming pool company and was quite skeptical. The more I used it, the more I found uses for it. I am very sensitive to most products and found that yours did not aggravate my asthma or allergies and it is wonderful for cleaning just about everything." - Anita Finn

"I just recently began using your product. I took on a cleaning "project" like you have never seen before. The home I had to clean had 13 years worth of filth (not dirt!). If I did not have your product with me, I would never have been able to get anywhere in that place!!! Spray Nine chewed through the layers upon layers of grease, dirt, and other things that I won't disgust you with by describing...I just wanted you to know that Spray Nine has become my primary cleaner and I will recommend it to everyone I know. All I'll have to do is show them the before and after pictures I took and they too will be hooked!!! So, THANK-YOU for making such an incredible product!" - Tammy Fowlie

"I have got a Spray Nine experience for you to tell. My Dad was a smoker for 40 years in the same apartment and so was my Grandmother when she was alive. Back in February of this year I needed to put my Dad in a nursing home, after a fall and broken hip. Now the task of cleaning his apartment and 40 years of cigarette smoke that encrusted everything. My choice was Spray Nine, from my past experience with your product. I sprayed the walls, windows and anything that was going to be saved with your product, and the nicotine did not stand a chance. When I got to the kitchen walls they had wall paper on them, and not wanting to stop working I used Spray Nine to remove the wallpaper glue. If you would like I will send you my "Before Spray Nine and After Spray Nine" and a many coats of paint photos. Thanks again for the great product." - Richard Tobias

Spray Nine®

Multi-Purpose
Cleaner/Degreaser/Disinfectant

**The most versatile
"power tool" in your janitorial arsenal!**

Bring achievable cost savings in-house with **Spray Nine!** This award-winning, industrial strength formula saves labor across a wide variety of tough-task applications.

**Just one product to clean, degrease, disinfect & deodorize!
Proven by over 50 years of daily use in the field.**

Give us your worst - you'll love the results!

CLEANING

Everything from manufacturing equipment, engines and machinery to countertops, floors and washrooms...with labor reducing speed.

- This unique formula contains award winning technology that:
 1. Weakens a soil's ability to cling to surfaces
 2. Lifts soils and traps them in a tiny bubble known as a micelle to be rinsed away.

DEGREASING

Great alternative to heavy solvent degreasers that harm the environment and expose workers to poor indoor air quality

- VOC compliant in all 50 states
- Water-based formula
- No petroleum solvents
- No chlorinated solvents

DISINFECTING

EPA Registered (#6659-3)

- Kills 99.9% of germs in 10 seconds
- Disinfects against viruses in 30 seconds
- Disinfects against bacteria in 45 seconds
- Helps meet OSHA bloodborne pathogen requirements
- Helps control mold/mildew growth
- Helps prevent cross contamination of germs

IS YOUR DISINFECTANT REALLY WORKING?

Only if you keep surfaces wet with disinfectant for as long as the label indicates. High contact time (up to 10 minutes) can require you to re-apply more disinfectant to keep the surface wet. This means excessive product use, possible surface damage from chemical exposure, and inefficient use of your time!
